About Me

Soon to be graduate completing a dual degree in Computer Science and Entrepreneurship, with a strong focus on software development and systems engineering. A fast learner and self-driven problem solver, experienced in leveraging modern development tools and AI-assisted workflows to accelerate debugging and development. Seeking a graduate/ junior software engineering role.

Technical Skills

- **Programming:** Python, Java, C, JavaScript, React, SQL, Bash, PowerShell, HTML, CSS.
- **Infrastructure & Tools:** Linux, Docker, Git, AWS, Active Directory, VMware vSphere.
- **Core Focus:** Machine Learning, Deep Learning, Networking Protocols (TCP/IP, BGP), Systems Architecture.

Technical Projects

DigitalSystems-Nand2Tetris

Built a fully functioning computer system entirely from scratch to understand how hardware and software truly connect. Starting with nothing but a single NAND chip, I built all the hardware components up to a custom CPU inside a hardware simulator using HDL. From there, I wrote the entire software ecosystem in Java to bring it to life, including an assembler, a virtual machine translator, and a compiler for a custom high-level language.

Education

B.Sc. Computer Science & B.A. Entrepreneurship (Dual Degree)

2023 – 2026

Reichman University

- **GPA:** 95.9 | Dean's List (2nd Year)
- **Selected Coursework:** Machine Learning, Deep Learning – Python (NumPy, PyTorch).

Academic Exchange Program

10/2025 – 02/2026

University of Innsbruck, Austria

Computer Science (Transfer Track)

2022 – 2023

The Open University of Israel

Work Experience

NOC Engineer

2023 – Present

Passportcard Labs

- Monitor and troubleshoot network and server issues in real-time to ensure system stability and high uptime.
- Handle incident response workflows, escalate critical alerts, and maintain detailed operational logs.
- Collaborate closely with cross-functional technical teams to resolve infrastructure problems efficiently.

NOC Engineer

2022 – 2023

Ness Digital Engineers

- Monitored infrastructure, managed incidents, and served as an administrator for a secure system environment.

Military Service

Sayeret Givati & Pilot Course

2018 – 2021

Israel Defense Forces

- Began military service in the Pilot Course, completing four months of intensive training before joining Sayeret Givati.

Languages

Hebrew: Native.

English: Fluent (lived in the UK from 2004-2008).
